Letter from Cambodia

for Cambodian Children
A community-based care organisation

September 2023

Hello from all of us at Hope for Cambodian Children Foundation, Battambang.

Computers are essential tools for education in the 21st century, but they are often inaccessible or unaffordable for many students in Cambodia. Since we received the computers from the donors, we have seen significant improvements in the motivation and learning outcomes of the students. We have been able to practice computer skills such as typing, coding, designing, and editing. These skills are very useful and valuable for the future careers and opportunities of the students. We are very thankful for your donation of computers, Mrs Jenny McAuley's fundraising effort and the international award winning DJ FLUME as they have transformed our learning environment. We have seen more confidence, creativity, and enthusiasm from our learners and we look forward to achieving our goals and dreams with the help of these computers.

Before starting computer and English classes, the students in the community center are often chatting and laughing with their friends. Some of them play games such as tag, hopscotch, basketball, or football while others share stories and jokes while having snacks. They enjoy the warmth of feeling relaxed and energetic. They greet their teachers and classmates with smiles and hugs, ready to learn and have fun. They are happy to be at the center where they felt safe, supported, and valued.

Currently we have 33 staff working at HOPE Community Centre. 32 staff members are Cambodian and one is Australian (In Country Director). HOPE has five departments. Management Department has three staff members, Social Welfare Department has seven staff members, Education Department has 13 members, Administration and Finance Department has three staff members and Maintenance and Security Department has seven staff members.

HOPE Community Centre is running very well because of these professional staff members working together towards common goals. Thank you so much to all staff for working so well at HOPE.
